Melinda - OK, thanks for your willingness to work overtime and during the weekend. This is very much appreciated!

Phil

**Subject:** summary on my overtime hours

Hi Phil,

Here's a summary, fyi, on hours worked due to the Gold King mine spill response.

Other than Shannon, I was the only WQS staff in the office on Friday. Maria/David asked for assistance in quickly pulling together WQS-related information for the Animas river in New Mexico. I assisted on Friday, and David indicated I could contact Angela Restivo to determine if there was a need for me to be on-call over the weekend. She indicated that would be very helpful and David gave me the okay, so I coordinated with Maria to get the necessary comp time form together. However, by Sunday, Angela asked me if I would be willing to come to Addison to assist. I said yes, and at that point, was brought into the REOC as part of the water team. As such, I later learned that all my time on Sat/Sun and any overtime earned on Mon would be reflected as overtime and billed to the superfund account. So, here's a summary of total overtime hours earned.

Due to the spill, I worked the following overtime hours:

PP17: 1 hour on Sat (8/8)

PP18: 10 hours on Sun (8/9) and 4.25 hours on Mon (8/10)

(Also worked in the REOC for about 6 hours on Tues (8/11), but total hours worked that day were <8hrs since I had to leave early for doctor's appt.)

During one of the morning briefings in the REOC this week, folks on DFS were instructed to ask our timekeepers to convert us from DFS to a strait 8-hr day for the pay periods in which we worked overtime (in my case PP17 and PP18). This should not present a problem for PP18. (I won't plan on earning or using CH during this pay period).

However, Carolyn is helping me to figure out what I need to do for PP17. Even though I did work 1 overtime hour on Sat (8/8), I also used and earned CH during PP17. Any CH earned was unrelated to the spill, so I'm not sure what will need to happen with those CH earned during PP17 if we have to convert PP17 to a straight 8-hour day.

Thanks,

Melinda
